HAPPY PAWS

Happy Paws, was founded by a group of women, that have dedicated every spare free second of their days to, rescuing, feeding, fostering, nurturing and loving any animal that has crossed their path that need help. Now we not only help those who come to us, we go out and help those that need it. We don't only focus on the township arrears, but instead on all and every area in cape town where we can be of help. We strive to help with feeding all hungry animals we see, as well as sterilization, medical treatment if nessacary, fostering, rehabilitating and rehoming of stray, neglected and unwanted fur kiddies. All of which without donations comes out of our own pockets with no regrets. We believe and live by the fact that each and every single animal deserves, a happy and loving home filled with love, affection, proper nutrition, exercise. Each and every Paw deserves and has a right to a happy life.

Sincerely Paws

The Happy Paws team

The ever-increasing number of stray and neglected animals adds fuel to the cycle of abuse and suffering.

Our key focus areas are:

Sterilisation

- Sterilisation – we wish to sterilise as many animals as we can, as sterilisation will help curb the flow of stray and neglected animals. Each sterilisation costs R300 +, and donations towards sterilisations are critical for us to sterilise as many animals as possible every year.

Did you know?

South Africa has enough puppies/dogs already, and all the country really needs is enough people to love them. One female cat + her offspring can produce 420,000 cats in 7 years (source: HSUS). One female dog and her offspring can produce 67,000 dogs in 6 years (source: HSUS) that's why it's so important to sterilise your pets!

Treatment and feeding

- We wish to help on a daily basis the stray, neglected, unwanted and abused paws as well as pet owners, to assist when animals have been injured, sick,

HAPPY PAWS

given birth or need help with food and caring for their animals. Our team aims to collect sick and injured animals, have them treated by a vet, and returned to the owner once the animal has recovered. Or in the case of feeding help the pet owner, whether it is by supplying food or helping the pet owner feed their animals. As for strays I hope is to Re home them to their perfect families

Education

- We are planning on focusing on educating the pet owning public about sterilization and the positive outcome of proper nutrition, caring and wellbeing of all animals out there, As well as educating the communities about responsible animal care through appointments with any one of our team members.

Rescue and Rehoming

- We aim to rescue as many Stray and abused animals as humanly possible to give them the second chance at a warm and happy life they need and deserve. The process will include a site visit to prospective new owner, official adoption documentation and ensuring that the pet is sterilized, healthy and up-to-date with all vaccinations.

HAPPY Paws Believes that each and every animal has a right to the Happy life and we strive to provide that, whether it is by rescuing and re homing, foster care or educating the pet owner on the best possible way to care and provide for your "furry Friend". We will not stop as long as there is an animal in need.

With that in mind our key principles
are

- **Non-Profit:** We will rely solely on public and corporate donations to cover the costs of our astronomical vet bills, feeding schemes, sterilisations projects and upkeep of our foster pets

HAPPY PAWS

- **Pro-life:** We will only ever euthanize if it is in the animals best interests and there are no other options – we will fight for each life.
- **Pro-active:** We will not sit around and wait for animals in need to come to us. Instead we will spend every free minute we have in the communities **LOOKING** for the animals that need help.

***This is our mission, and we take it on gladly, with or without help,
we will help those who can't help themselves, our furry friends that
need us, now and forever***

Thankfully Paws

The happy Paws Team
